

STARPROOF WF SP 600 High Quality Waterproof Membrane

It is a special synthetic resin based flexible, thixotropic white colour waterproof coating. Its white coating offers excellent UV Resistance. This membrane can be applied to wood and metal surfaces also. Use of special primer in metal may be necessary. The membrane can be applied for all roofs to any extent of slope.

Features

- ❖ Seamless, tough & flexible coating
- ❖ Single part, Thixotropic compound
- ❖ Superior wetting & adhesion properties
- ❖ Light weight than conventional roofing
- ❖ Highly solar reflective coating
- ❖ Unique additives to make it highly durable

Benefits

- ❖ Withstands expansion/contraction & resists crack
- ❖ Requires no mixing or heating, ideal for vertical/horizontal uses
- ❖ Excellent bond to most building material (old or new)
- ❖ Eliminates other costly forms of other roofing system
- ❖ Provides insulation or cooling effect
- ❖ Highly resistant to oxidation, UV & ozone. Lasts longer

USES: Waterproofing for roofs ranging from asphalt, asbestos, cement to concrete and terrazzo tiles. Ideal for roof slabs, terraces, balconies, sun shades, parapet walls, etc. Offers added waterproofing & protection when used as base / intermediate coat in BBC/ IPS flooring. Waterproofing membrane for FLAT ROOFING SYSTEMS (Traditional and Inversed)
